

QUALITY POLICY

HONNES HEALTH,

Prioritizing the human factor and health, ensuring the production of safe products in line with the measurable and acceptable levels of quality parameters and reflecting the customer expectations on our products within the scope of continuous improvement as a principle,

Our aim is to develop and present superior brands with excellent quality in order to gain the satisfaction, trust and loyalty of our customers and stakeholders, to meet all legal requirements, to fulfil customer requests and to meet different needs and expectations. It is to sustainably add value with a problem-solving-oriented management approach by constantly raising our standards with continuous improvements, corrective and preventive actions. To empower the understanding of team building on business and human factor under the scope of Cost-Benefit Principle,

To define the principles that all employees in Honnes Health have to comply with in order to correspond with the customers by building a transportation and distribution network all over the world by producing reliable products in the cosmetics industry in line with the understanding of product safety management, and to provide products and brands of high standards,

To provide our customers with high quality, environmentally friendly and innovative products, developed in the environments that comply with the regulations regarding Quality, Environment, Occupational Health and Safety, Product Requirements, Product Safety, GMP and REACH, and environmental and quality management system conditions, along with a perspective of continuous improvement,

To reduce the use of resources in compliance with the best practices on energy efficiency, energy use and energy consumption and to carry out the necessary acts for the efficient use of natural resources,

Honnes Health undertakes to comply with and maintain the quality and product safety system within national and international standards, the requirements of the age, technological developments and customers' demands and expectations.
